3 STORY

HARBORFRONT INN MODULAR BUILT

Harborfront Inn is a luxury hotel located on the north fork of Long Island, amidst the blossoming wine country. This is the first hotel to be built in the area in over 25 years. Modular construction provided a rapid fast-track production process. At the same time, it incorporated luxurious features including oversized soaking and whirlpool baths, spacious showers with floor to ceiling porcelain tile and body-jets. Balconies were designed overlooking the Peconic Bay and Shelter Island.
